

# Sasco Certified

## Weighbridge Operator Course

The Sasco Certified Weighbridge Operator training program series (SCWO) provides training in the key aspects of weighbridge operations, ranging from becoming a competent weighbridge operator through to key aspects of metrology, verification procedures, and software. The program series comprises in total five courses, which build progressively on the knowledge acquired.

Attendees should be persons with at an education level equivalent to at least a school leaver certificate with English being a subject, who wish to become competent professional weighbridge operators.

The SCWO comprises a program of five progressive courses each with its own certification. Each of the five courses are paid for separately and the Attendee selects the start date.

**Next Course Date:** Our training is delivered via our online portal and can be taken at any time from the comfort of your home or office.

**Course Duration:** The first few courses will take 3-4 hours to complete, and the subsequent material will require approximately 5-6 hours to complete

**Training Delivery:** The course will be delivered online via video streaming (in addition to written exams) so you won't need to travel anywhere.

**Your Instructors:** In addition to having many years of lecturing experience under their belt, they are all certified and can help you if you get stuck.

**Examinations:** In order to earn your certification, you will need to pass a final examination (it has 60 questions and you have an hour to complete it)
